

Operational eco-efficiency of RIMAC Seguros 2021¹

At Rimac Seguros we are **committed to protecting the environment**. This commitment is demonstrated in our environmental policy and in the initiatives that we have been implementing for several years to reduce the environmental impact derived from our operations.

Our main environmental outcomes are the following:

- Our 2021 carbon footprint was 4,174.68. 18.5% less than in 2020
- We offset 319.82 tCO₂eq of the 2021 carbon footprint.
- 61% of our energy consumption came from renewable sources
- We successfully carried out our third carbon footprint audit with an external verifier, evaluating the 2021 inventory, under ISO 14064:2018.
- Our Environmental System is certified with ISO 14001, keeping us the first Peruvian insurance company to have this certification, and our environmental indicators are reported for our 14 subsidiaries in Perú.
- In 2021 we inaugurated “Torre del Parque II” in the district of San Isidro, an eco-friendly building that has LEED Gold pre-certification (Leadership in Energy & Environmental Design), awarded by the US Green Building Council (US Green Building Council). This building has an energy saving of 15% compared to a conventional one, more than 90% of its rooms have access to natural light and it has intelligent sensors that prevent lights from being left on accidentally. In addition, our Wilson and Juan de Arona sites have LED lighting technology to reduce energy consumption, as well as water-saving systems in the lavatories and tanks.

Greenhouse Gas Emissions

At Rimac we measure the greenhouse emissions in scopes 1,2 and 3. It is worth mentioning that we were recognized in 2021 by the Ministry of the Environment, awarding us 3 stars in the “Peru Carbon Footprint” platform for the measurement, reduction, compensation, and audit of our corporate footprint.

Scope	Emissions generated by RIMAC (tons CO ₂ -eq)			
	2018	2019	2020	2021
Scope 1	610.71	614.22	352.97	324.71
Scope 2	850.82	956.66	468.24	376.54
Scope 3	4,732.17	4,665.39	4,303.59	3,473.33
Total	6,193.70	6,236.27	5,124.80	4,174.68
Coverage (%)	100	100	100	100

* Our target of reduction for 2021 was 5% greenhouse gas emissions for scopes 1 and 2.

Emissions from Business Travel (tons CO2-eq)				
	2018	2019	2020	2021
Emissions from Business Travel (tons-CO2eq)	500.26	564.02	94.36	97.97
Coverage (%)	100	100	100	100

Energy and water consumption

Efficiency in energy and water consumption is one of the pillars of RIMAC's environmental management, as it is one of the factors with the largest emissions within our carbon footprint. For this reason, for several years we have been striving to incorporate green technologies to our different offices to reduce the use of these natural resources.

Consumption of electric power of the National Network (Mwh) [GRI 302-1]				
Type	2018	2019	2020	2021
Non-Renewable Energy	1,768.52	1,930.75	1,056.45	930.20
Renewable Energy	3,262.84	3,562.13	1,949.10	1,499.15
Total	5,031.36	5,492.88	3,005.55	2,429.35
Coverage (%)	100	100	100	100

* Our target of reduction for 2021 was a 10% of reduction in non-renewable energies consumption

Water

Consumption of total water use in million cubic meters [GRI 306-5]				
	2018	2019	2020	2021
Consumption of total water use in million cubic	0.043693	0.041418	0.020987	0.027958
Coverage (%)	100	100	100	100

* Due to the coronavirus pandemic in 2020, we had a significant reduction in water consumption in our offices, however, we are committed to using water in a sustainable way, for this reason, we defined a water consumption reduction target based on 10% related to 2019 as a base year.

Waste and recycling management

At Rimac Seguros we constantly monitor the generation of waste within our company with the aim of proposing long-term reduction proposals.

Total waste generated (metric tonnes) [GRI 306-2]				
Waste Disposed	2018	2019	2020	2021
Total waste generated	144.25	140.63	15.03	11.98
Total waste used/recycled/sold	21.57	32.28	4.64	0.85
Total waste disposed:	122.6	124.44	10.39	11.13
-Waste landfilled	122.6	124.44	10.39	11.13
– Waste incinerated with energy recovery				N/A
– Waste incinerated without energy recovery				N/A
– Waste otherwise disposed, please specify:				N/A
– Waste with unknown disposal method				N/A
Coverage (%)	100	100	100	100

* Due to the coronavirus pandemic in 2020, we had a significant reduction in waste generation in our offices, however, we have been committed to reducing waste in a sustainable way, for this reason, we defined a waste generation reduction target based on 10% related to 2019 as a base year.
