

Operational eco-efficiency of RIMAC Seguros 2020¹

At Rimac Seguros we are **committed to protecting the environment**. This commitment is demonstrated in our environmental policy and in the initiatives that we have been implementing for several years to reduce the environmental impact derived from our operations.

Our main environmental outcomes are the following:

- Our 2020 footprint was **5,124.80 tco2eq**, 17.66% less than in 2019
- We offset 556 tCO₂eq of the 2020 carbon footprint.
- 64.85% of our energy consumption came from renewable sources
- Our building “Torre del Parque I” located in San Isidro has the LEED (Leadership in Energy & Environmental Design) gold level certification, granted by the US Green Building Council. This building has energy savings of 15% compared to a conventional one; more than 90% of its areas have access to natural light and it has intelligent sensors that prevent lights from being left on accidentally. During 2020, construction continued “Torre del Parque II”, a building that will be opened in 2021 and will increase the environmental standards of the previous one.
- We successfully carried out our second carbon footprint audit with an external verifier, evaluating the 2020 inventory.

GHG emissions generated by RIMAC's activities (tons CO₂-eq) [GRI 305-1,305-2,305-3]			
Scope	2018	2019	2020
Scope 1	610.71	614.22	352.97
Scope 2	850.82	956.66	468.24
Scope 3	4,732.17	4,665.39	4,303.59
Total	6,193.70	6,236.27	5,124.80

Emissions from Business Travel (tons CO₂-eq)		
2018	2019	2020
500.26	564.02	94.36

Energy and water consumption

Efficiency in energy and water consumption is one of the pillars of RIMAC's environmental management, as it is one of the factors with the largest emissions within our carbon footprint. For this reason, for several years we have been striving to incorporate green technologies to our different offices to reduce the use of these natural resources.

Consumption of electric power of the National Network (Mwh) [GRI 302-1]			
Type	2018	2019	2020
Non-Renewable Energy	1,768.52	1,930.75	1,056.45
Renewable Energy	3,262.84	3,562.13	1,949.10
Total	5,031.36	5,492.88	3,005.55

Water

Consumption of total water use in million cubic meters [GRI 306-5]		
2018	2019	2020
0.043693	0.041418	0.020987

Waste and recycling management

At Rimac Seguros we constantly monitor the generation of waste within our company with the aim of proposing long-term reduction proposals.

Total waste generated (metric tonnes) [GRI 306-2]			
Waste Disposed	2018	2019	2020
Total waste generated	144.25	140.63	15.03
Total waste used/recycled/sold	21.57	32.28	4.64
Total waste disposed	122.6	124.44	10.39
